

Townhouse Project

Using electric tank this townhouse project is heated with a JH 30

This townhouse utilized Energy Saving Products space saving JH model to give the home owner more free space for the living environment. The JH units were used for Heating in this project and ideal when matched up with electric tanks. Quick and simple to install everyone walked away happy from this project.

Energy Saving Products Ltd.
JH-30 Air Handler

JH unit placed in the closet so very little space was used to provide heating for the suites of this Townhouse
